The Real Estate Market and Assessed Values for 2017

Clackamas County real market values continue to increase. Under our property tax system, taxes are based on the lesser of market or maximum assessed value (MAV). MAV generally grows 3% each year resulting in an assessed value growth of 3% and a tax increase of about 3%. That's typically how the mechanics of Measure 50 were designed to work and this will be the outcome for many property owners again this year. However, we have a complex system and it won't be the case for everyone. There are situations that result in a property tax increase greater than the typical 3%. These include changes to property like remodeling, new construction, new money measures or a combination of changes. **As market values rise, property owners may have less tax savings from Oregon's other property tax limitation, Measure 5.**
