**BACKGROUND:**

The Clackamas County Jail serves as the only correctional facility for Clackamas County, with the facility currently processing approximately 16,000 offenders annually. The original jail structure was built in 1959 with the capacity for about 85 prisoners. Subsequent additions to the original building occurred in 1982, 1990 and more recently 2005 and 2012 with the capacity increasing to nearly 440 inmate spaces.

The original roof excluding the 2005 and 2012 additions consists of approximately 65,000 square feet of concrete substrate with rolled asphalt/fiberglass composition roofing. While the concrete substrate is still in good condition, the age and wear on the asphalt roofing is beginning to produce minor leaks that have required repeated maintenance measures to control. It has been determined a new membrane roof will meet the needs and budget for this project.

In addition to the roofing issues, the current assorted HVAC units installed on the roof have reached and exceed their operable life spans. In 2006 half of the jail's HVAC roof units were replaced, leaving 20 units that are nearing 24 years in operation. This contract will replace the aging units and properly integrate the new units into the new roof system.

This contract has been reviewed and approved by County Counsel

**RECOMMENDATION:**
