**BACKGROUND:**

Through a joint funding agreement the U.S. Geological Survey maintains flow monitoring stations on Kellogg and Rock Creeks in CCSD#1. This work entails routinely making stream flow measurements, taking water level readings, and maintaining measuring devices installed in the creeks. The data is analyzed by the USGS and used to create rating tables that can relate instantaneous water level readings with associated stream flow amounts. WES staff use these flow tables for routine water quality monitoring to fulfill state and federal non-point source pollution requirements, and also to measure stream health. This agreement allows for the acquisition of accurate water flow-rate data which:

- Supports measuring progress being made towards reducing stormwater discharge volumes and other elements of the Watershed Protection program.
- Is combined with the water quality data from the sites to measure stream health. This data will also be submitted to Oregon's Department of Environmental Quality on an annual basis.

This agreement has been reviewed and approved by County Counsel.

**RECOMMENDATION:**

District staff recommends the Board of County Commissioners of Clackamas County, acting as the governing body of the Clackamas County Service District No. 1, approve the Joint Funding Agreement between the Clackamas County Service District No. 1 and the U.S. Geological Survey for creek flow monitoring.

Respectfully submitted,

Greg Geist, Director
