REQUEST FOR QUOTES #2017-75
Mobile Mapping for 2018/2019 Contract Paving Season

RESPONSE TO CLARIFYING QUESTIONS
September 13, 2017

Note that these are questions submitted by interested firms to the above referenced solicitation. The below answers are for clarification purposes only and in no way alter or amend the RFQ as published.

1. The RFQ states “Intersecting streets shall be shown 200’ from the edge of pavement of the street being mapped.” Does this include collecting mobile LiDAR scans for these 200’ distances and delineating all features such as edge of pavement, striping, outline of driveway aprons, etc.?

Answer: Yes

2. The RFQ states the data delineation task will include “any roadway appurtenance including manholes, catch basins, valve covers, and power poles (mapped as points).” How far back from the edge of pavement will such objects be mapped? Will this include other objects not specifically listed in the task item such as telephone pedestals, signs, mailboxes, etc.?

Answer: Only the appurtenances physically in the asphalt would need to be shown in the base map.

End of Clarifying Questions #2
