

# 2012 EMERGENCY PREPAREDNESS

## IN CASE OF EMERGENCY CALL 9-1-1

Non-Emergency Number \_\_\_\_\_  
Poison Control 1-800-222-1222 \_\_\_\_\_

## MEDICAL

Primary Insurance Provider \_\_\_\_\_  
Insurance Group Number \_\_\_\_\_

Name of Doctor or Clinic \_\_\_\_\_  
Address \_\_\_\_\_  
Phone \_\_\_\_\_

Pediatrician \_\_\_\_\_  
Phone \_\_\_\_\_  
Address \_\_\_\_\_

Name of Preferred Hospital \_\_\_\_\_  
Hospital address \_\_\_\_\_

## MEDICATIONS & ALLERGIES

Name/type of medication(s) \_\_\_\_\_

Name/allergy type \_\_\_\_\_

Name/type of medication(s) \_\_\_\_\_

Name/allergy type \_\_\_\_\_

Name/type of medication(s) \_\_\_\_\_

Name/allergy type \_\_\_\_\_

## DENTAL

Primary Insurance Provider \_\_\_\_\_  
Insurance Group Number \_\_\_\_\_  
Name of Dentist or Clinic \_\_\_\_\_  
Phone \_\_\_\_\_

## VETERINARIAN

Name of Doctor or Clinic \_\_\_\_\_  
Phone \_\_\_\_\_  
Pet(s) \_\_\_\_\_

## EMERGENCY CONTACTS

### Personal

Name \_\_\_\_\_  
Relationship \_\_\_\_\_  
Phone \_\_\_\_\_

### Work

Name \_\_\_\_\_  
Relationship \_\_\_\_\_  
Phone \_\_\_\_\_

### Family Members

Mother \_\_\_\_\_  
Phone (cell) \_\_\_\_\_  
Phone (work) \_\_\_\_\_

### Father

Phone (cell) \_\_\_\_\_  
Phone (work) \_\_\_\_\_

### Other Family Contact

Name \_\_\_\_\_  
Relationship \_\_\_\_\_  
Phone (home) \_\_\_\_\_  
Phone (cell) \_\_\_\_\_  
Phone (work) \_\_\_\_\_  
Is this contact local? Yes/No \_\_\_\_\_

### Friend

Name \_\_\_\_\_  
Relationship \_\_\_\_\_  
Phone \_\_\_\_\_  
Is this contact local? Yes/No \_\_\_\_\_

### Neighbor

Name \_\_\_\_\_  
Address \_\_\_\_\_  
Phone (home) \_\_\_\_\_  
Phone (cell) \_\_\_\_\_

### Other

Name \_\_\_\_\_  
Address \_\_\_\_\_  
Phone (home) \_\_\_\_\_

## UTILITIES AND SCHOOLS

### Electricity

Company \_\_\_\_\_  
Phone \_\_\_\_\_  
Emergency phone \_\_\_\_\_  
Circuit breaker location \_\_\_\_\_

### Gas/Heating

Company \_\_\_\_\_  
Phone \_\_\_\_\_  
Emergency phone \_\_\_\_\_  
Internal shut off location \_\_\_\_\_  
External shut off location \_\_\_\_\_  
Shut off tool location \_\_\_\_\_

### **WARNING**

IF YOU MUST TURN OFF THE GAS DO NOT TURN IT BACK ON!  
ONLY THE GAS COMPANY CAN TURN IT BACK ON.

### Sewer

Company \_\_\_\_\_  
Phone \_\_\_\_\_  
Emergency phone \_\_\_\_\_

### Telephone Service

Company \_\_\_\_\_  
Phone \_\_\_\_\_  
Emergency phone \_\_\_\_\_

### Schools

Family member \_\_\_\_\_  
School \_\_\_\_\_  
Address \_\_\_\_\_  
Telephone \_\_\_\_\_  
Evacuation location \_\_\_\_\_

### Family member

School \_\_\_\_\_  
Address \_\_\_\_\_  
Telephone \_\_\_\_\_  
Evacuation location \_\_\_\_\_

Emergencies can occur at any time and without warning-they may be localized in your home or neighborhood or they may be county or region-wide. This calendar contains valuable information that you can use to prepare, protective actions you can take when disaster strikes, and steps you can take to minimize the impact of a disaster on yourself and your community.

If you live or work in Benton, Clackamas, Clark, Columbia, Linn, Multnomah, Washington Counties or the City of Portland, visit [www.publicalerts.org/signup](http://www.publicalerts.org/signup) to find out more about registering for emergency notifications via home phone, cell phone, VOIP, text and emails.

### 1. Develop an Emergency Plan

- Review hazards that could threaten your family and know what you will do in an emergency
- Identify an out-of-town and/or out-of-state emergency contact
- Identify evacuation routes from your home and designate a nearby location where you will meet to make sure everyone is OK
- Know how to turn off gas, water and electricity
- Review and practice your plan with all family members every year
- Make sure your phone numbers are included in your local emergency notification system. Contact your local emergency manager for more information
- Know the emergency procedures in your workplace and for your children's school

### 2. Assemble a Disaster Supplies Kit

- Water – bottles and filtration, or treatment supplies capable of providing 1 gallon per person, per day for at least 3 days
- Food – ready to eat, non-perishable, high protein and high calorie foods
- First Aid Kit and First Aid Reference Guide
- Dust mask or scarf, eye protection, heavy soled shoes and gloves
- Flashlights with spare batteries or glow sticks
- Blankets, extra clothing, clean socks and underwear
- Small fire extinguisher
- Extra medications, eyeglasses, hearing aids, etc
- List of emergency contact phone numbers
- Copies of important documents (birth certificates, insurance papers, IDs and financial information)
- Personal toiletries and comfort items such as toys and books
- Tools, plastic wrap, crescent wrench or multi-purpose tool for utility shut-off
- Cash and coins for emergency purchases
- Emergency supplies for your pets including food, water, medications, pet carrier, ID tags and recent pictures of your pet

### 3. Know What To Do in an Emergency

#### Earthquake

- DROP under a desk or table
- COVER your head/neck
- HOLD ON until shaking stops

#### Shelter-In-Place

- MOVE INSIDE IMMEDIATELY
- Close and lock all windows and doors
- Turn off heating, cooling and ventilation systems
- Move to an interior room
- Listen to the radio or TV for instructions
- Remain inside until officials issue an "All Clear"
- Take your disaster supply kit with you when you shelter in place

#### Evacuate

- Leave immediately
- Take disaster kits and pets with you
- Lock your home
- Use designated evacuation routes only

#### What Else Can I Do?

- Get to know your neighbors and their contact information
- Check on neighbors, especially those who may need assistance
- Learn CPR/First Aid or other disaster response skills (see March)
- Give emergency first aid to victims
- Limit telephone use unless there is a life-threatening emergency
- Listen to radio or TV for instructions
- Always follow instructions from local officials
- Keep an emergency supplies kit in your car

# January

## Flooding and Landslides

### During a Flood

If a flood is likely in your area, you should:

- Listen to the radio or television for information.
- Be aware that flash flooding can occur. If there is any possibility of a flash flood, move immediately to higher ground. Do not wait for instructions to move.

If you must prepare to evacuate, you should do the following:

- Secure your home. If you have time, bring in outdoor furniture. Move essential items to an upper floor.
- Turn off utilities at the main switches or valves if instructed to do so. Disconnect electrical appliances. Do not touch electrical equipment if you are wet or standing in water.
- Do not walk through moving water. Six inches of moving water can make you fall. If you have to walk in water, walk where the water is not moving. Use a stick to check the firmness of the ground in front of you.
- Do not drive into flooded areas. If floodwaters rise around your car, abandon the car and move to higher ground if you can do so safely. You and the vehicle can be quickly swept away.

### Landslide and Debris Flow (Mudslide)

Mudslides occur during periods of intense rainfall or rapid snowmelt. They usually start on steep hillsides, liquefy and accelerate down the hill. The debris flow ranges from watery mud to thick, rocky mud that can carry large items such as boulders and trees. Always listen to the radio and television for the latest information and instructions for your area.

## Preparedness for People with Functional and Access Needs

Do you need a little extra help to live independently? Some of the tips below may help you continue your independence during an emergency.

### **Create a Support Team**

- “Buddy up” with family and friends to help each other in an emergency. Include one out of state contact.
- Give members of your support team a spare key to your residence.
- Show your team members how to operate and safely move any special equipment.
- Make sure your service animal is friendly with everyone in your support team.

### **Create a Disaster Supplies Kit** (See page two of this calendar)

- Buy or make a medical alert tag or bracelet to help identify your medical condition/allergies.
- Complete a medical list that you and your team can use that includes medical provider’s contact information, medication dosage and schedule, and copies of insurance and Medicare card, and other important documents.
- Keep at least one week’s supply of important medication always available.
- If you need life sustaining treatment, know the location of more than one facility.
- Equipment should be kept in good working order, with extra supplies such as batteries, chargers, patch kits and oxygen tanks. Have extra magnifiers, eyeglasses and hearing-aid batteries, as well as paper pads and pencils to communicate. Include manuals, style and list of serial numbers of equipment, equipment weight and how to transport.

### **Personal Training and Education**

- Know what assistance you may need before, during and after a disaster.
- Know what to do and safe places to go to during disasters.
- Identify which exit routes from a building are best for individuals with mobility restrictions.

# March

Prepare - Organize - Train - Volunteer

Being personally prepared for an emergency is only part of the solution. If your neighbors and community are not prepared, neither are you. For the 5 Citizen Corps programs listed below visit: [www.citizencorps.gov](http://www.citizencorps.gov) or contact your local Emergency Manager.

- **Community Emergency Response Teams (CERT and NET)** are community members that have been trained in basic emergency response skills.
- **Fire Corps** members offer their time and talents to their local fire/EMS department in a nonemergency capacity providing public education and response support.
- **Medical Reserve Corps (MRC)** volunteers are health professionals committed to providing critical medical skills during a major emergency.
- **Neighborhood Watch** is a program enlisting participation of neighbors partnering with law enforcement to reduce crime.
- **Volunteers in Police Service (VIPS)** perform public education/outreach and administrative tasks, allowing sworn officers to respond to emergencies.

#### Other opportunities include:

- **Voluntary Organizations Active in Disaster (VOAD)** coalitions of faith-based and civic/humanitarian organizations that coordinate and provide services to people after disaster strikes. Your local organization may be called COAD (Community Organizations Active in Disaster). Washington [www.wavoad.org](http://www.wavoad.org)  
Oregon [www.orvoad.org](http://www.orvoad.org)  
National [www.nvoad.org](http://www.nvoad.org)
- **American Red Cross** provides free emergency preparedness education to the community, trains volunteers to respond to local and national disasters and provides victims of disaster with shelter, food, crisis counseling and recovery planning.  
[www.redcross.org](http://www.redcross.org)
- **Map Your Neighborhood (MYN)** is a neighborhood-based program that encourages and teaches emergency preparedness, hazard mitigation and priority actions in an emergency or disaster situation.
- **Search and Rescue** organizations are all volunteer non-profit organizations dedicated to providing Search and Rescue assistance for people who are lost or injured out of doors.  
[www.mthoodsarcouncil.org](http://www.mthoodsarcouncil.org)
- **Amateur Radio Unit** is composed of volunteers who become licensed, trained and ready to respond in a communications emergency when amateur radio may be the only reliable method of communication.  
Washington [www.wastateares.org](http://www.wastateares.org)  
Oregon <http://oregonaresd1.org>

## Earthquake and Tsunami Preparedness

### Earthquake Preparedness

- Create a Disaster Supplies Kit (see page two)
- Identify safe places indoors and outdoors
  - Safe indoor spots are desks, sturdy tables, against inside walls, away from windows and unsecured mirrors, hanging objects and tall pieces of furniture
  - Outside in the open, away from buildings, trees, and electrical or telephone lines
- Secure top-heavy items such as bookcases, china cabinets and entertainment units to wall studs
- Move pictures/glass away from beds
- Keep a response kit under the bed: hard-soled shoes, gloves and flashlight

### During an Earthquake

- DROP under a desk or table
- COVER your head/neck
- HOLD ON until shaking stops

### After an Earthquake

- Expect aftershocks
- Listen to the TV or a battery operated radio
- Use the phone only for emergency calls
- Stay away from damaged areas
- Inspect gas, electric and water utilities. Leave the area immediately if you smell gas. Assume any downed power lines are live and STAY AWAY

[www.fema.gov/hazard/earthquake](http://www.fema.gov/hazard/earthquake) and <http://earthquake.usgs.gov>

### Tsunami Preparedness

Tsunamis are caused by earthquakes or underwater landslides. They can travel over 500 miles per hour and reach inland within minutes.

- If you are at or near the coast, seek out tsunami evacuation information in your area
- Sometimes a tsunami initially causes the water near the shore to recede, exposing the ocean floor
- If you are at the beach or near the ocean and you feel the earth shake. Move immediately to higher ground once the shaking from the earthquake has stopped
- Follow the tsunami evacuation signs and stay away from rivers and streams that lead to the ocean
- Remain on higher ground and listen to the radio for directions. Do not return until emergency officials have declared an "ALL CLEAR"

## Volcanoes and Avalanches

### Volcanoes

#### During an Eruption

- Follow instructions issued by authorities
- Avoid areas downwind of the volcano
- Stay indoors if possible. Close all windows, doors and dampers. Seal openings with plastic if possible.
- Put all machinery, animals and livestock inside a garage or barn
- If caught in a rock fall, roll into a ball to protect your head
- Avoid low-lying areas where poisonous gases are most dangerous
- If caught near a stream, move upslope

#### After the Eruption

- Volcanic ash consists of tiny jagged pieces of rock and glass. Ash can turn daylight into complete darkness, cause breathing problems and other injuries, power outages, damage equipment and prevent communications
- Listen to a battery-powered radio for emergency information
- Cover your mouth and nose with a filter mask or wet cloth; wear goggles to protect your eyes; keep skin covered to avoid irritation or burns
- Stay indoors until health officials advise it is safe to go outdoors
- Avoid driving in ash fall
- For more <http://volcanoes.usgs.gov>

### Avalanches

Almost all avalanches occur on steep slopes between 35 and 45 degrees and in open areas, which are prime spots for skiers and snowmobilers. Avalanches occur because new or windblown snow overloads weak layers or because of rapid warming.

- Always check avalanche conditions with local authorities before your trip. Consider purchasing or renting a beacon
- Recognize the red flags: recent avalanches, unstable snow, heavy snowfall in the past 24 hrs, windblown snow and significantly warmer weather
- Carefully cross one person at a time and stay as far to the sides, not directly above each other
- If caught in an avalanche, make yourself lighter by quickly removing as much gear as possible, using “swimming motions” and thrusting upward to stay near the surface
- If you are buried, try to make an air pocket in front of your face and attempt to remain calm

## Animals in Disaster

Plan to take your animals with you if you have to evacuate. Only as a last resort should you leave your animals behind. Pets are unlikely to survive on their own. Create a Pet Disaster Supply Kit (see page two).

### Identify shelter

For public health reasons, many emergency shelters cannot accept pets. Do not wait until disaster strikes to do your research. Find out which hotels/motels/shelters in the area you plan to evacuate to allow pets.

### If you have no alternative but to leave your pet at home

- Leave them in a secure area inside your home. Never leave your pet chained outside!
- Leave them at least a 10-day supply of dry food and multiple plastic containers of water.
- Use signs on doors and windows to indicate type and number of animals inside and your contact information.
- Make sure identification tags are up to date and securely fastened to your pet's collar.

### Livestock in Disaster

- Adrenalin, panic and confusion affect both humans and animals.
- Survival instincts of livestock can make normal handling techniques ineffective.
- Handling techniques vary with each type of disaster. Research disasters for your area and plan how to handle livestock and where they can be sheltered.
- During a disaster, focus on immediate safety.

Learn more about disaster planning for your animals at [www.fema.gov/plan/prepare/animals.shtm#1](http://www.fema.gov/plan/prepare/animals.shtm#1)

Fireworks and thunderstorms cause animals great distress. Keep your pets secure and safe especially during fireworks and storm season.

### Lightning Safety

Plan in advance when you first see lightning or hear thunder. If you hear thunder, you may be within range of a lightning strike. Act immediately!

- If outdoors, avoid water, high ground, tall trees, open spaces, fences, and other metal objects.
- When possible, find shelter in a substantial building or fully enclosed metal vehicle. Keep the windows completely closed.
- If lightning is striking nearby while you're outside, you should crouch down, with your feet together and place your hands over ears to minimize hearing damage. Do not lay flat on the ground!

## Hot Weather Emergencies

In hot weather drink plenty of non-alcoholic, non-caffeinated fluids—early and often.

**Heat Cramps** are often the first sign you are overheated and/or your body is dehydrated.

**Heat Exhaustion** symptoms include headache, nausea, dizziness, weakness, ashen or flushed skin tone, cool and moist skin.

**Heat Stroke** is a medical emergency! Symptoms included warm, flushed skin, absence of normal sweating, very high temperature, delirium, unconsciousness or seizures. Seek immediate medical attention.

- In all three cases, take immediate steps to cool down; drink water if able.
- NEVER leave people or animals in cars or other enclosed spaces with no air circulation. Car temperatures can rise to deadly levels quickly.

### Water Safety

- Tell someone where you are going, when you expect to return, and where to call if you don't return on time.
- Know your limits as far as swimming abilities. Rivers can be cold and swift. Jumping into cold water can literally take your breath away.
- Wear a properly fitted Personal Flotation Device (PFD) when appropriate.
- Don't dive into an unknown body of water or shallow pool. Ease in or jump feet first.
- Never run near a pool. Water on the side can make it easy to slip and fall.
- Know about the dangers of heat stroke and hypothermia and how to deal with it.
- Wear sunscreen!
- Keep an eye on children playing near water at all times. It only takes a minute for a disaster to happen.
- Know your state's boating laws.

### Fireworks Safety

Annually there are nearly 10,000 people treated for fireworks related injuries. Protect yourself and others:

- Buy fireworks from reliable dealers and follow directions.
- Only use fireworks outdoors and make sure you have water nearby, preferably a garden hose.
- Never ignite fireworks during high winds as sparks can start fires.
- Do not light multiple fireworks at once.
- Dispose of fireworks only after soaking in a bucket of water.

# August

## Fire Prevention

Debris Burning is the number one cause of fires started by humans. Don't burn without a permit and NEVER burn on windy days. Consider alternatives to burning, such as chipping or recycling.

### Protect Your Home from Wildfire

- Create a 30-foot non-combustible fire break around your home, stack firewood away from your home.
- Trim branches along driveway so that they are 14' off the ground, 14' from other surfaces and 10' from roof and power lines.
- Use non-combustible roofing materials, keep gutters free from debris, and screen the vents under eaves and decks.
- Post your address in a location that is visible from all directions for at least 150 feet.
- Inspect your chimney at least twice a year, clean it once a year and install screens at the opening.
- Keep your yard well-watered and mowed short. Plant low growing, less flammable plants near your home.
- Check with your County Emergency Management Agency to see if they already have a Community Wildfire Protection Plan. For more information go to [www.oregon.gov/ODF/FIRE/FirePlans.shtml](http://www.oregon.gov/ODF/FIRE/FirePlans.shtml)

### Prevent House Fires and Plan for Escape

- Keep matches and lighters out of the reach of children.
- Fires in the home most often start in the kitchen. Cooking is the leading cause of home fires in the U.S. It is also the leading cause of fire injuries. These fires often result from unattended cooking and human error.
- Don't use water to put out a grease fire. ONLY use baking soda, salt, or a tight lid. Always keep a box of baking soda near the stove. If a fire should occur in a pan, slide a lid over it to extinguish the fire.
- Install smoke alarms on the ceiling of every level of your home near each sleeping area and in each bedroom.
- Test smoke alarm batteries monthly. Replace batteries annually and the smoke alarm every 10 years.
- Install fire extinguishers close to an exit and only use on small fires.
- Create a Home Escape Plan including at least two escape routes from each room and a safe meeting place.
- Practice your plan.

## National Emergency Preparedness Month

### What to do? It's easier than you might think!

#### Make a Family Emergency Plan

- Discuss with your family what you will do in an emergency.
- Have an evacuation plan and practice your plan!
- Know how to turn off water, gas and electricity.
- Designate a location away from your home to meet after evacuation.
- Designate an out-of-state contact.
- Consider joining your local Citizen Emergency Response Team (CERT).  
(Go to <http://citizencorps.gov> for more information)

#### Create a Disaster Supplies Kit (see page two)

Your Kit is simply a 3-day supply of food, water, clothing, medications, etc. in a container ready for emergency use. For more information visit [www.reallyready.org](http://www.reallyready.org) and [www.redcross.org](http://www.redcross.org)

#### Back To School Preparedness

If your child arrives home from school before adults, consider the following:

- Your child's age and maturity level.
- If this is the first experience, consider "dry runs" where you leave your child home alone for short periods of time.
- Leave a phone number where you and a trusted alternate can be reached. Schedule check in calls with your child.
- "Child-proof" your home and ensure your children have safe activities when alone.
- Practice handling emergencies. Make sure your child knows how to respond.
- Ask your child if they feel confident and ready to stay home alone. If they hesitate, hire a babysitter and reconsider this issue in six months.

#### Bus and Traffic Safety for Children

- Familiarize yourself and your child with school bus drop-off and pick-up.
- Refrain from using your cell phone or other distractions while around school zones.
- Have a safe place to wait for your bus, away from traffic and the street.
- Discuss "Stranger Danger" with your child.
- Have children stay away from the bus until it comes to a complete stop and the driver signals them to enter.
- For more safety tips [www.nsc.org](http://www.nsc.org)

\*Jewish Holidays begin at sunset of the previous evening.

# October

## Seasonal Safety

### Halloween

- See & Be Seen! Use reflective tape on bags, costumes, shoes, etc., and use face paint instead of masks.
- Accompany children who are trick-or-treating.
- Adults should always check treats for signs of tampering.
- Supervise pumpkin carving and use a child-safe kit.
- Consider a Halloween party in lieu of trick-or-treating outside.

### Driving Safety

- More crashes occur in fall and winter than other seasons. Darker, colder conditions call for different driving tactics.
- Give yourself extra time to reach your destination safely.
- Look carefully for bikes and motorcyclists - they are small and hard to see.
- Don't get overconfident with four-wheel drive. It won't help you stop any faster.
- Slow down in inclement weather and maintain extra distance between you and other vehicles.
- Avoid abrupt actions while steering, braking or accelerating to lessen the chances of losing traction and control of the vehicle.
- Look farther ahead in traffic. Actions by other drivers will alert you to problems and give you extra time to react.
- Trucks take longer to stop. Don't cut in front of them.

During the holiday season, and year-round, take steps to make sure that you and everyone you know avoids driving under the influence of alcohol. Following these tips from NHTSA can help you stay safe:

- Plan ahead. Always designate a non-drinking driver before any holiday party or celebration begins.
- Take the keys. Do not let a friend drive if they are impaired.
- Be a helpful host. If you're hosting a party this holiday season, remind your guests to plan ahead and designate their sober driver, always offer alcohol-free beverages, and make sure all of your guests leave with a sober driver. [www.nhtsa.gov/Impaired](http://www.nhtsa.gov/Impaired)

### Hunter Safety

- Learn about hunter responsibility and ethics.
- Discover how firearms work and learn about firearm safety.
- Improve your wildlife identification, game care, survival and first aid skills.
- Know your target, ensure there is a backdrop.
- Wear hunter orange.
- Hunter education is not just for kids and not just for hunters, but for all who enjoy the outdoors and have an interest in conservation.

## Public Health

### Medical Emergencies

A medical emergency is any condition that, if left untreated, could cause severe harm or even death. Getting immediate help in a medical emergency can mean the difference between a relatively simple cure or treatment, and a more complicated and costly intervention.

### Be Prepared

Always keep extra medications, prescription and medical information in your emergency supply and “go” kits. During a disaster, you may have to wait days to access or refill medications. Having a 3-7 day supply of extra medications can help avoid health complications and copies of your medical information will help you receive the medications and care that you need.

### Do you have the flu?

“The flu” or influenza is a respiratory (lung) infection that spreads throughout the community during the winter or spring. This is not the same illness as “stomach flu”. Normal symptoms include fever, coughing, sore throat, runny or stuffy nose, headaches, body aches, chills and fatigue.

Seek emergency care as soon as possible if someone has:

- Confusion or can't be woken up
- Difficulty breathing
- Pain or pressure in the chest or abdomen
- Blue lips or skin rash
- Unable to drink or keep liquids down
- Fever in an infant under 3 months old
- Excessive irritability in children

### Flu Prevention

- Wash your hands frequently
- Cough or sneeze into the crook of your elbow rather than into your hands
- Stay home if you are sick
- Obtain flu vaccine for yourself and your family

### Poisonings

- Poisonings take only an instant and children are most at risk
- Always check with caregivers to make sure medicine is given as directed
- Keep all medicines, poisons and cleaning supplies in a locked place and out of reach of children
- Child-resistant caps are preferred, but some children can open them
- Discard expired medications in garbage or take them to a “drug take back event”. <http://smarxtdisposal.net> and [www.poison.org](http://www.poison.org)

## Winter Driving Safety

### Winter Driving

- Keep an Emergency Supplies Kit in your car
- If you don't have to drive, stay home
- Keep your gas tank full
- Slow down, brake gently and use low gears to keep traction
- Slow down when approaching intersections, off-ramps, bridges or shady spots. These all have potential to develop black ice.

### If Caught in Winter Weather:

- Stay in the vehicle
- Run the motor about 10 minutes each hour for heat
- Open a window a little for fresh air and to avoid carbon monoxide poisoning
- Make sure the exhaust pipe is not blocked
- Tie a colored cloth to your antenna or door

### Putting On Snow Chains:

- Find out whether your car has front-wheel drive or rear-wheel drive. This can be done by looking in your car owner's manual. Snow chains are always placed on the driving wheels. For example, if your car is rear-wheel drive, install the chains on the rear wheels.
- Check in the car owner's manual for any reference to class "S" or limited clearance for snow chains. If your tires require a limited-clearance product, refer to the car owner's manual for further instructions, because conventional snow chains should not be used on your vehicle.
- Pull your car completely off of the road and away from moving traffic. Putting the snow chains on your car in the road is a significant hazard to all motorists, including you.
- Follow the instructions on the tire chain box, as different companies have different ways of installing the chains.
- Do not exceed the maximum speed listed on the snow chain box while driving with chains on your tires.
